

## Connecting Laboratories, Researchers and Funding

**GLASS is an innovation platform designed to modernize how private laboratories connect with the scientific ecosystem.**

### Our mission:

- Make laboratories more visible.
- Make collaboration easier.
- Make scientific progress faster

### The Problem:

- Low visibility — hard for companies, researchers or partners to find them
- Inefficient discovery — no centralized place to search for labs and equipment
- Underused equipment — expensive tools remain idle
- Limited collaboration — labs rarely connect with each other
- Lack of funding access — early-stage research struggles to attract support

**These gaps slow down innovation across Europe.**

### Our Solution:

GLASS Stage 0: "GLASS - CONNECT" A searchable directory of laboratories across Europe, where each lab can:

- Create a verified profile
- Showcase equipment, expertise, services
- Increase visibility
- Receive collaboration requests
- Connect with similar labs or companies
- Build credibility with transparent information

**This is the foundation for the entire GLASS ecosystem.**

### What we are building now

Phase 0 (Current): Visibility + Lab Directory + Early Matching

#### Future Phases:

Phase 1 — Science donation platform

Phase 2 — Transparent research investment platform

Phase 3 — Tokenized scientific equity

**GLASS will eventually allow public donors and investors to support vetted research projects with full transparency on scientific impact.**

# "Why Join GLASS Now?"

Page 2/2

## Early Partners Get Strategic Advantages

We are now building partnerships with laboratories that want:

- Higher visibility within the French and European ecosystem
- More collaboration opportunities
- A place to showcase equipment and expertise
- Access to companies seeking scientific services
- A voice in shaping future GLASS features
- Positioning as early adopters of a new scientific infrastructure

## Why this matters?

We are preparing the first version of the GLASS directory to be shared with a selection of laboratories for early feedback.

**Joining now gives labs direct access to:**

- Priority onboarding
- Featured visibility
- Early platform input
- Role as reference partners

## Next steps

We are finalizing our MVP and onboarding early partner laboratories. Your expertise and feedback will help shape the platform and future features.

We look forward to building this ecosystem together.
